

# AN INVESTMENT IN R&D? CHOOSE POLAND!

Implied Tax Subsidy Rates on R&D Expenditures for Profitable Large Firms in OECD/non-OECD countries, 2022

**Implied tax subsidy rate** measures the extent of the preferential treatment of R&D in a given tax system. The more generous the tax provisions, the higher the implied subsidy rates for R&D.

## 3 other reasons why you should invest in Poland:

- **Investor-friendly public policy** with domestic/EU grants that have attracted leading companies
- Poland's **central location** makes it the bridgehead connecting the EU and NON-EU economies
- **Human capital** is Polish strength, as Poland ranks third (EU countries) in the prestigious PISA raking, while wages in Poland are much lower than the EU average
